

Visual Arts Home Learning

Hello Parents & Carers,

My name is Jo Green and I am the Visual Arts teacher at AVSS. You will find links attached to the art tab on the schools website for your child's grade. You can use these suggested activities to assist your child to enjoy art at home. Understandably, many of you may not have access to art equipment and materials. I have tried to create activities that require minimal need for art supplies. If you do have access to materials please encourage your child to spend time in the week being creative. Art can be a very important part of a child's development. Visual Arts provide children with a form of communication and expression. This is so important especially at this time. Art activities can also be a wonderful way to relax and clear the mind.

Viewing artworks and sharing ideas is another way to enjoy art. If you do not have art equipment at home, students can still explore art from around the world. The links in the art tab can help you to find artworks by famous artists. You may like to assist your child to talk about and read about art using these resources.

Please do not hesitate to contact me via Seesaw or Webex if you would like to chat about art activities. I will be posting more structured activities through Seesaw in weeks to come. You will also receive basic supplies in your classroom stationary pack that you will be able to use for art activities.

I look forward to seeing your child's artworks posted on Seesaw.

Stay safe & well

Regards

Jo
